3.75 (a) REPEAT

HOUSING FACILITIES, GENERAL.

The off exhibit enclosures, housing animals used in the live animal show presentations, has loose and rusty wire across the front and doors. The safety of the animals and the structural strength of the enclosures can be compromised by rusty and loose wire. This wire needs to be replaced and or repaired and maintained in good condition. A regular program of enclosure inspection needs to be in place to detect problems before they become major events.

Correct by: 17-June-2013

An exit interview was conducted with the owner at close of inspection.
